Summary

I am a PhD student at the University of British Columbia specializing in digital signal processing for communication systems. My research journey began with an M.A.Sc., where I pioneered a lowpass filter model to understand the interaction between probabilistic shaping and fiber nonlinearity. This model led to the development of a novel sequence selection scheme, enhancing nonlinearity tolerance. During my PhD studies, I concentrated on devising a phase recovery algorithm tailored for probabilistic shaping in low-SNR scenarios. I am currently exploring the application of neural networks and sequence models in optical communication systems as part of my ongoing doctoral research.

Research Experience

M.A.Sc. & PhD Thesis at Data Communications Group   *ECE Department, UBC*

RESEARCH ASSISTANT (SUPERVISOR: PROF. LUTZ LAMPE)   *Sep. 2020 - Sep. 2026*

- Studied probabilistic signal shaping methods, with a focus on probabilistic amplitude shaping for optical fiber communications.
- Introduced a low pass filter model to explain the interplay between probabilistic shaping and fiber nonlinearity.
- Suggested a new sequence selection scheme to improve nonlinearity tolerance in probabilistic amplitude shaping for optical fiber communications.
- Designed Bayesian phase search algorithm for carrier phase recovery in the low-SNR regime.
- Studied end-to-end sequence-based auto encoder approach for probabilistic shaping.

Research Internship at Roche Canada   *Greater Toronto Area, Canada*

ALGORITHM R&D SOFTWARE ENGINEERING INTERN   *Jun. 2024 - Oct. 2024*

- Designed and implemented pipelines for feature extraction, dataset generation, and neural network training, enabling efficient anomaly detection in sequencing data.
- Developed and optimized weakly supervised neural network models, including a novel multi-label architecture for multi-class anomaly segmentation.
- Integrated interpretability and complexity analysis into the training workflow, delivering detailed reports and insights for model evaluation and enhancement.

Research Interests

Machine Learning in Communications

Applications of Sequence Models in Communication Systems

Information & Coding Theory

Education

PhD in Electrical & Computer Engineering   *Vancouver, Canada*
Electrical and Computer Engineering Department, The University of British Columbia (UBC)   *Sep. 2022 - Present*
- Advisor: Prof. Lutz Lampe

M.A.Sc. in Electrical & Computer Engineering   *Vancouver, Canada*
Electrical and Computer Engineering Department, The University of British Columbia (UBC)   *Sep. 2020 - Aug. 2022*
- Cumulative GPA: 93.7 out of 100 (4.0/4.0) via 18 credits
- Advisor: Prof. Lutz Lampe

B.Sc. in Electrical Engineering   *Tehran, Iran*
Department of Electical Enginerring, Sharif University of Technology (SUT)   *Sep. 2015 - Jul. 2020*
- Cumulative GPA: 18.42 out of 20 (4.0/4.0) via 146 credits
- Advisor: Prof. Hamid Behroozi

Software Proficiency

Programming   Python, Matlab, R, Git version control, SQL, Julia, C/C++.

Relevant Courses

Course	Grade	Instructor	University	Term
CPSC 436N-Natural Language Processing	*95.0 out of 100*	**Dr. Shwartz**	*UBC*	*Winter1 2023*
EECE 571D-Detection, Estimation, and Learning	*98.0 out of 100*	**Dr. Lampe**	*UBC*	*Winter2 2021*
EECE 562-Statistical Signal Processing	*90.0 out of 100*	**Dr. Wang**	*UBC*	*Winter1 2021*
CPSC 540-Advanced Machine Learning	*96.0 out of 100*	**Dr. Schmidt**	*UBC*	*Winter2 2020*
CPSC 340-Machine Learning & Data Mining	*100 out of 100*	**Dr. Wood**	*UBC*	*Winter1 2020*
EECE 565-Communication Networks	*95.0 out of 100*	**Dr. Wong**	*UBC*	*Winter1 2020*
Introduction to Machine Learning	*18.0 out of 20*	**Dr. Mohammadzade**	*SUT*	*Spring 2019*
Information & Coding Theory	*18.7 out of 20*	**Dr. Mirmohseni**	*SUT*	*Fall 2018*

Selected Course Projects

COVID-19 Detection: A Combination of Transformer Models with Image Augmentation Methods   *Winter 2020*
COURSE: Advanced Machine Learning   *UBC*
- Studied methods for generating synthetic X-ray images to improve the accuracy of COVID-19 detection models and implemented GAN and VAE to augment data.
- Applied transformer models to COVID-19 classification based on chest X-ray images.
- Supervisor: Dr. Schmidt

Trajectory Prediction   *Winter 2020*
COURSE: Machine Learning & Data Mining   *UBC*
- Studied methods for autonomous driving trajectory prediction and implemented a chained neural network model.
- Supervisor: Dr. Wood

COVID-19 Deaths Prediction   *Winter 2020*
COURSE: Machine Learning & Data Mining   *UBC*
- Studied algorithms for time-series regression and implemented linear auto-regressive model.
- Supervisor: Dr. Wood

Honors & Awards

Nominated for UBC Four Year Doctoral Fellowship with an amount of $18,200 per year.   *2023*
Awarded UBC 2021 M.A.Sc. Graduate Student Initiative (GSI) with an amount of $5,000.   *2021*
Member of the National Elites Foundation by being in the best ranks of the University entrance exam.   *2015-Present*
